Noida, India

Technical Skills

Languages: JavaScript, HTML, CSS

Frameworks/Libraries: Node.js, Express.js, React.js, Redux Toolkit, Context API, Tailwind CSS, Jest

Databases/APIs: MongoDB, GraphQL, REST APIs

Cloud/DevOps: AWS, Azure (Blob Storage, WAF), Nginx, PM2, Git, GitHub

Tools/Concepts: VS Code, Postman, Claude, JWT Authentication, Rate Limiting

Education

JMIT, Radaur, Yamunanagar **Aug 2021 – Jun 2025**

Bachelor of Technology in Information Technology

Experience

Seventh Triangle Consulting Pvt Ltd **Aug 2025 – Present**

Associate Software Engineer *Noida*

- Optimized the signup process, reducing response time by **1.5 seconds** through query optimization.
- Reduced a CRM wallet search query's latency from **15s to 300ms** using **MongoDB indexes** and query pre filtering.
- Addressed **multiple security vulnerabilities** identified during a **KPMG audit** by implementing security controls to mitigate various **attack vectors** and strengthen application security.
- Designed **rollback handling** for the **payment wallet** and shipped a dashboard for **failed redemptions and refunds**, improving user experience and cutting customer support queries.
- Cut fraudulent **OTP** traffic by **96%** by implementing **Azure WAF** rules and **phone and IP based rate limiting** at the application level.

Hoping Minds - Certificate **Jul 2024 – Aug 2024**

Internship *Mohali*

- Integrated **JWT** authentication to ensure secure user data access and utilized **bcrypt** for safe and encrypted storage of user passwords in the database.

Projects

CartBridge - Sync Cart And Analytics | *React JS, MongoDB, Express JS, Node JS* **Link** **Apr 2026**

- **Description:** Developed an application facilitating cross-device shopping cart synchronization, enhancing the customer checkout experience and reducing cart abandonment.
- Implemented a merchant dashboard using **React.js** and **Context API** for state management.
- Developed an analytics module featuring interactive graphs and an email-based CSV export system to help store owners track cart activity.
- Automated **CI/CD deployment** using **GitHub Actions**, enabling automatic deployment of application to **AWS EC2** on code changes.
- Deployed the application on **AWS** and configured **Nginx** for custom domain.

ScholarsBridge - Online Education Platform | *React JS, MongoDB, Express JS, Node JS* **Link** **Oct 2024**

- **Description:** Developed an interactive platform allowing teachers to list educational content and students to access and study it seamlessly.
- Implemented **Razorpay** for payment processing and **Cloudinary** for efficient and secure cloud-based data storage.
- Developed the **registration and login pages** on the frontend using **React.js**.
- **Implemented thunk-based async flows** for OTP signup, login, password reset, and profile updates that dispatch loading/error state alongside API calls, and **persisted auth token, user, and cart slices to** localstorage.

Technical Achievements

- **Leetcode** - Solved 250+ problems based on Arrays, Strings, Recursion, Linked Lists, Stacks, and Trees. **Link**
